Overview of the Spain Market Hub

KICKOFF - Participants

Spanish Green Market Hub is intended to be open, an where all the interested parties feel comfortable to exchange ideas between them in relation to deploying energy efficient mortgages in the market with a focus on identifying obstacles and potential enablers for market development.

In the short term, it is crucial to obtain support and collaboration of important market actors.

The main obstacle is to encourage others to join the HUB and to be committed without short term outcome.

Launch Spanish Green Market Hub in the beginnings of 2020.
